

Good Day,

In regard to the threat to Satellite radio & the NAB petition, I want to express to you that satellite radio is the only thing that I can listen to with variety. The weather, traffic & news channels are also beneficial.

I am a person who doesn't care to listen to regular radio with tons of commercials & the useless (in my opinion) events of not great importance to me. Satellite radio is the best thing since sliced bread & I support Satellite radio a 100%.

Please, reject the NAB petition 04-160 against XM Radio & other satellite radio companies. This is a free country & not everyone agrees to listen to regular FM/AM radio when there is something better to listen to without the commercials & the useless information that they are paid to broadcast over the airwaves.

Sincerely,
Eames Yates
